

How to enable your microphone in your browser

- 1 The first time that the Microphone Setup appears, or when the user clicks a Record button, they will probably receive a message from their browser that asks if they wish to enable the microphone, such as:

Or:

- 2 For any such message, the user should click "Yes," "Allow," or "Share Selected Device" so that the microphone is enabled for use in their browser. If possible, it is recommended to "Always" allow the microphone to be used, so that this prompt does not appear again during use of the application.

- 3 If the user does not allow the microphone to be used, they will not be able to use their microphone in conversations or exercises in the course.
- 4 If the microphone suddenly stops working, the user should be able to restart it by clicking the Refresh button in their browser.
